

**AUTOMATIC DECLUSTERING MACHINE FOR CASTING  
mod. VM/SAM**

**Drawer for collecting products**

**Inside view of the machine**

**Samples**

The automatic declustering machine for casting **mod. VM/SAM** is projected in order to cut and split pieces obtained from casting processing from the central part of the casting feeder head.

The machine can work both in **manual and automatic mode**, piston forwarding and rotation through hydraulic power unit.

The device is equipped with: **automatic lock of the cluster** through hydraulic piston, **manual adjustment of cutting tool rotation**, a **drawer** for collecting pieces.

**DECLUSTERING MACHINE FOR CASTING TECHNICAL SPECIFICATION**

- <b>Dimensions mm</b>	1700x940x1780
- <b>Weight</b>	570 kg
- <b>Production</b>	According to the product - from 1/3 pieces/min
- <b>Electrical power required</b>	2.2 kw
- <b>Electricity feeding system</b>	380 v, +T
